## Approved Registered Nurse Programs

### Introduction

The Nursing Education Program Approval Board (NEPAB) list of Approved Nursing Education Programs includes Alberta approved education programs leading to initial entry to practice as a registered nurse. When a nursing education program is approved by NEPAB, the name of the program is added to the list and is circulated to stakeholders including the CARNA Registrar, Alberta Innovation and Advanced Education, and Alberta Health to provide notice that:

- Graduates of the approved nursing education program are eligible to write the registration examination approved by CARNA Provincial Council, and
- Successful candidates may then apply for initial registration with CARNA to commence practice as a registered nurse.

NEPAB may be one of several levels of approval required before a new nursing education program can commence. Additional approvals may still be required when a program has been approved by NEPAB and added to the list of approved nursing education programs. It is, therefore, recommended that the individual educational institution be contacted for information regarding the commencement of a specific nursing education program.
